

latter is for a camera with a printer. The combination of Mankowitz and Silverbrook is improper and the claimed invention is not obvious in the light of this combination. The Applicant submits that these are not equivalent inventions.

The Examiner has failed to supply relevant prior art singly or in combination whereby a camera is loaded with a program which manipulates the output image as well as providing such program on a card having printed dots as the medium which is the instant claimed invention.

In view of the foregoing it is respectfully contended that all claims now pending in the above identified Patent Application recite a novel and not obvious system which is patentably distinguishable over the prior art. Accordingly, withdrawal of the outstanding rejection and the allowance of all claims now pending are respectfully requested and earnestly solicited.

Very respectfully,

Applicant:

KIA SILVERBROOK
